

**Permit Managers Meeting  
March 2, 2017, 9:30 am- 12:30 pm  
ADEQ offices, Conference Room #3100A  
1110 W. Washington Street  
Phoenix, AZ 85007**

**Agenda**

**EPA**

- Discussion of any notable upcoming permits from AZ agencies
- Rulemaking updates from AZ agencies
- FLM notification procedures
- Specific updates
  - Intel (Maricopa). I spoke to Manny, and he tells me that while he has some follow up questions, he does not see anything worth mentioning at the managers meeting.
  - Copper Crossing (Pinal). We should ask Kale for an update on their draft permit/public notice schedule. We're just about to initiate the ESA and NHPA consultation process, and Cleve has spent some time looking through their modeling report. We have a separate call with Pinal to discuss this later this week, so there's no need to get too far into the details during this meeting.
  - Hickman Egg Tonopah (Maricopa). We should ask Richard for an update on their draft permit/public notice schedule. We should let them know (if we haven't already) that we're likely to submit a public comment regarding a fugitive emission determination. Beyond that, the less said the better at this point.
  - Maricopa NSR rule (Maricopa). I spoke to Shaheerah, and she tells me that she's still compiling a list of issues to discuss with Maricopa, and that we'll be in touch to discuss them soon. We are still on track for a proposed rule by this summer.
- Regulatory updates
  - Appendix W Revision. Final Rule published on January 17, 2017. Effective date delayed until March 21, 2017. The final rule included many updates, including revisions to NO<sub>2</sub> Tier 2 and 3 screening techniques, updated AERMOD and AERSCREEN versions, elimination of CALPUFF as preferred model for long range transport modeling, use of background concentrations in PSD full impact modeling, and significantly new procedures for addressing Ozone and Secondary PM<sub>2.5</sub> impacts. Draft guidance for establishing Model Emission Rates for Precursors was released on 12/2/2016 for public comment, with an extended public comment deadline of 3/31/2017.
  - Removal of TV Emergency Affirmative Defense Provisions. Removes "emergency provisions" from Part 70 and 71 regulations, and is essentially a follow up to the SSM SIP Call. Proposed rule published in Federal Register on June 14, 2016. Final rule is on hold pending direction from HQ.
  - Establishing PSD Significant Emission Rate for Greenhouse Gases, Revisions to the GHG Tailoring Rule. Proposed rule was in response to June 23, 2014 UARG v EPA Supreme Court decision April 10, 2015 DC Circuit Court judgement. Proposed rule published in FR on October 3, 2016. Comment period closed on December 2, 2016, and are being reviewed.

- Revisions to Title V Petition Provisions. Sets forth clearer guidelines and more detailed process for submitting title V petitions. Also allows for electronic submittal of petitions. Proposed rule published in FR on August 24, 2016; comments are currently being reviewed.

### **Maricopa County**

Landfill rules (NSPS XXX and Cf).

### **ADEQ**

General Permit renewals

myDEQ move notice and notification to counties

Permitting within Indian country

Tour of Permits performance and flow boards (after the meeting concludes)

### **Pinal County**

Ammonia Limits in PSD permits for natural gas power plants

### **Pima County**

Decommissioning of Stage II Vapor Recovery Systems.
